PROFESSIONAL SUMMARY

Frontend Developer and Bachelor of Science (B.Sc.) in Information Technology graduate with strong knowledge of HTML, CSS, JavaScript, React.js, Tailwind CSS, Redux Toolkit and REST API integration. Skilled in building responsive, user-friendly web applications using clean and reusable code. Possess a solid foundation in Python along with NumPy and Pandas for data analysis and problem solving. Currently learning the MERN Stack and continuously expanding my knowledge of modern web technologies.

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), Python

Frontend: React.js, Tailwind CSS, Redux Toolkit, React Router

Python Libraries: NumPy, Pandas

Backend: Firebase, REST APIs

Tools: Git, GitHub, VS Code, Vite, Parcel, Postman

Concepts: Responsive Design, API Integration, State Management, Component-Based Architecture

EXPERIENCE

AI Intern

2025

NIELIT in collaboration with the Department of Information Technology, Sri Pratap College

Hybrid

- Successfully completed the **Foundation of Artificial Intelligence Technology (NSQF Level 3.5)** internship.
- Gained practical experience with Python using VS Code, Google Colab, and JupyterLab.
- Worked with NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, PyTorch, NLTK, and OpenCV.
- Learned Machine Learning concepts including Linear Regression, Decision Trees, model evaluation, and data preprocessing.
- Explored Deep Learning techniques such as Artificial Neural Networks (ANN) and Convolutional Neural Networks (CNN).
- Built foundational knowledge in Natural Language Processing (NLP), Computer Vision, Ethical AI, Generative AI, and introductory AI deployment and Cloud/MLOps concepts.

EDUCATION

Bachelor of Science in Information Technology

2023–2026

Cluster University of Srinagar

CGPA: 7.0

PROJECTS

Personal Portfolio Website

HTML5 — CSS3 — JavaScript

- Designed and developed a responsive portfolio website using HTML, CSS, and JavaScript.
- Learned responsive web design, DOM manipulation, UI development, and clean code practices.
- Improved understanding of website structure, user experience, and cross-browser compatibility.

BMI Calculator

HTML5 — CSS3 — JavaScript

- Built a BMI Calculator that computes Body Mass Index from user input.
- Learned JavaScript functions, event handling, form validation, and dynamic calculations.
- Strengthened logical thinking and interactive UI development skills.

Weather Application

HTML5 — CSS3 — JavaScript — OpenWeather API

- Developed a weather application using the OpenWeather API to display real-time weather.
- Learned REST API integration, Fetch API, JSON parsing, asynchronous JavaScript, and error handling.
- Improved knowledge of working with external APIs and dynamic data rendering.

To-Do Application

HTML5 — CSS3 — JavaScript

- Created a task management application with add, edit, delete, and complete task features.
- Learned DOM manipulation, Local Storage, CRUD operations, and event-driven programming.
- Enhanced understanding of building interactive and maintainable web applications.

ACHIEVEMENTS

- Built multiple frontend applications using HTML, CSS, JavaScript, and React.js.
- Strong foundation in frontend development, REST API integration, and responsive web design.
- Continuously learning the MERN Stack and modern web development practices.
